

5162 Belmore Ave.  
Montreal 29, Que.  
November 10, 1961.

Dear Jim,

Thanks for the card on comet Seki. None of us has seen it yet. November has been a poor month to date. But if and when we do, we'll let you know.

Re comet announcements, I was speaking to David Sands and Bryan Rawlings last month night and they are quite eager to send such announcements out over VE2RAM for you. In addition, of course, to cards such as the one you sent me, since we can't be sure of reaching everyone by radio. So would you give this some thought as to how to send the information to the boys and a standard form in which to transmit it over VE2RAM. And perhaps you could mention this means of communication in your next bulletin to the centres.

Incidentally, Geoffrey has had one reply to date to his first circular - from the Halifax centre.

Best regards,

Dabe Williamson
