Jim Low
411 Brixton Ave,
St. Lambert, P.Q.

Dear Mr. Low,

Thank you for the copy of Bulletin # 1 of the Comet and Nova Section.

To answer your question in the second paragraph, I am not aware of anyone in the Hamilton Centre having done any work on comets or novae. I feel sure, however, that some members would like to participate in a comet and nova search program if procedures and methods were outlined to them.

I will talk to those members most likely to be interested in this work and we will select a contact to handle the reports and correspondence with yourself.

Yours sincerely,

J.G. Craig
