Dear Mr Low:

This will acknowledge BULLETIN NO.1, Comet and Nova Section, dated November 15, 1961.

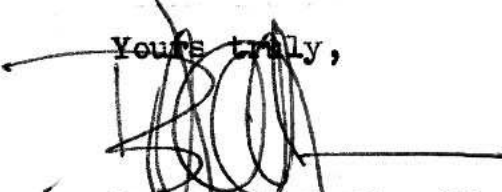

To-date the Halifax Centre has not done any work on Comets and Novae. Even so we would like to take part in the national observing programme and look forward to receiving full instructions concerning your proposed procedure in this field.

All members of the Halifax Centre will be made aware of this programme in a later issue of GALAXY. In the meantime would you please direct all correspondence to me at the following address as I will be heading this section:

I sincerely hope that your Section receives the cooperation of all Centres and look forward to corresponding with you in the future.
