419 Windsor Street,
Halifax, N.S.

Dear Mr Low:

This will acknowledge your letter of December 14, 1961, which had enclosed information concerning the Comet and Nova Section.

Your card of December 6, 1961, announcing comet Seki was received and a number of members of the Halifax Centre have been alerted. However to date due to poor weather conditions and inexperience in observing this type of object I must report that no sighting has been made.

Forms C. & N. No. 1, 2, 3, & 4 have been studied and it appears that we should have no trouble in following them to your satisfaction. However the sheet listing the various areas does have some unanswered questions. Would you be kind enough to explain its working? I find it difficult to associate the circle in the lower left hand corner of the page with the numbers listed under right ascension and declination at the top of the page.

Wishing you a Happy New Year.

Yours truly,

B. W. Allen.
