

411 Brixton Avenue

St. Lambert, P.Q.

October 22, 1962

Dear Mr. Maclean,

Thank-you for the letter of October 6, and for the reports. September was the best month yet for C & N searches, as you can see from the copy of the summary (enclosed). Congratulations on your fine work in the C & N Section. As you can see from the list, you made more searches than any other observer in the first nine months of this year.

Yes, the Montreal Centre is quite active in this programme. The Centre already had a Comet Search programme under way when this programme started --- the only Centre that did, as far as I know.

Unless something unforeseen occurs, I hope to attend the General Assembly of the RASC in Toronto next May. Perhaps I will meet you there?

Best regards to you and the Centre. Good observing,

  
Jim Low
