

St. Lambert, P. Q.
March 31, 1908

Dear Mr. Gillson,

Thank-you for the latest search reports. Did you have a large supply of CAN Search report forms made up, or would you like me to send you a supply?

How are observations of the nova or Comet Ikoya coming along? I made a number of observations of the nova, but made only one of the comet. A new faint comet (Alcock, 1908 b) has been discovered, and here is a rough ephemeris:

Apr. 4	19:10.2	52°01'	7.7
12	18:45.0	54 05	7.3
20	18:04.9	55 55	7.0

Date R.A. Dec. Mag.

Best regards, and good observing,
