Dear Mr. Low,

I am an unattached member of
the R.A.S.C. and would like to join
your Comet and Nova section of the
National Observing Programme. I have
a lot of interest in comets although my
2.4-inch refractor is too small to have
much ~~chance~~ ^{chance} of discovering ~~one~~ ^{one}. However
I would appreciate the chance, through the
announcement cards, to see them earlier.

I am very familiar with the sky
and should be able to contribute something
to the nova checking as I observe for
long periods on most clear nights.
I am a 16-year old high school student.

Yours Sincerely,
Alan D. Whitman
