						TOTAL..... 173 175 191 539					
						"D" Dome. --- Misc. search					

After the area number and name of observer is the number of searches made during each month of 1963. Only observations received by April 24 have been included, and it is expected that March is incomplete. During the first three months of 1962, 285 searches were made, compared with 539 for the same period this year.
