411 Brixton Av .
St. Laurent, P.Q.

April 9, 1968

Dear Mr. Maclean,

Thank-you for your letter of April 4, and the report on the new Comet Alcock. I received a new ephemeris on April 6, and have mailed out Announcement #7 giving the positions for this comet. Although it is not too bright, ~~but~~ will be well placed for northern observers. I have not seen it myself yet --- I found the moon too bright.

If you require any more forms, let me know and I will send you some.

Best regards to you and the Centre. I hope to meet you in Toronto on May 17.

Good observing

Jim Low
