Dear Dr. Scartliff,

Thank-you for your observations on Comet Alcock. My last observation was on April 28/29 at 03:40 U.T. and I estimated it within one degree of the predicted position, near magnitude plus seven or eight. I used an 8" reflector at 60x. I have not looked for it since that date, as I was out of town for a while.

Best regards to you and the Winnipeg Centre.

Jim Low
