

102 Cliff St.  
Battle Creek, Mich.  
July 28, 1963

Dear Mr. Low:

Terribly sorry that I didn't show up at the bus station. The blasted trains run on standard time, so I assumed that the blasted buses did too; but they don't. So, when I arrived at the bus station to meet you I arrived at 5:30 PM by my watch and by train time, but at 6:30 PM bus time, city time, and your time.

Again I wish to express my regrets.

Sincerely,

*AJ Morhouse*

1. Howdy
2. I have chosen areas 373; 383; 305; 291, to work with.
3. Harvard finally got around to notifying me about my "great discovery". To quote them exactly: "Thank you for your telegram of June 23 describing your sighting of a comet-like object. The object is undoubtedly Comet Ikeya, discovered in early January 1963. I am enclosing a copy of the Harvard Announcement Card that gives the predicted positions of Comet Ikeya." --- Then from HAC 1590 we find

June 20	RA 2347	Dec 22
June 30	RA 23 18	Dec 22

while I reported

June 23	RA 23 34	Dec 22
---------	----------	--------

also, they give Mag 12.2, while I estimated 11 or 12. Oh Well.

4. Where are you going to be for the eclipse? I was going to go to Bangor, Maine, but because of cost and time I guess I'll go to Three Rivers, Quebec, instead. At this late date I've started to get busy trying to fashion some sort of camera arrangement to bring with me. I think I'm going to buy a movie camera with telephoto lens, and I'm busy trying to make some sort of descent, or decent, or desent, or however it's spelled, tripod.
5. Sincerely yours,
6. A.J. Morehouse
