Downsview Ont.

Dear Jim,

I just received a call from Miss Northcott today (Saturday Mar. ~~15th~~ 21st) and she urgently needs a final draught of my paper for the Journal. I explained of my absence and she said I should send her the relevant material as soon as possible.

I would like to weigh on you for the light curve of Nova Herc 1963 as soon as possible since this is all I need to complete the paper.

I have looked through my stacks of mail and indeed I have misplaced - or rather it was misplaced for me - a months observations. I am being pressured into ~~some~~ observing so I think you will see a few observations from me this spring & summer.

Thanks Jim.

Terry
