

88 Lorne Ave.,  
St. Catharines, Ont  
Thurs. Oct. 3, 1943

Mr Jas. W. A. Low,  
411 Briston Ave.  
St. Lambert, P.Q.

Dear Sir:

Enclosed are the negative search reports  
for September 1943. Two thirds of the nights were  
partly clear for northern areas, but the southern ones  
were often "hazed in".

You will also find magnitude estimates  
of Nova Herculis 1943 for August and September. This  
nova is now one magnitude fainter than the faintest  
comparison star that is used. Would you have any  
comparison stars in the range of 10<sup>m</sup> to 11<sup>m</sup>, near the  
nova? If so, they would be appreciated.

Sincerely

Hugh W. A. Maclean,  
Niagara Falls Centre.
