Dear Mr. Mawlean,

Thank you for your letter of October 3, and for the reports. The AAVSO has a good chart of the Nova Herculis area showing stars down to 12th magnitude, and enclosed is a quick tracing I made of it.

I have not seen the nova for a few weeks now. I find I spend more time on paper-work than actual observing! The nova is still fading gradually and hasn't taken a steep decline for a short time as would be expected.

Best regards, and good observing,

Jim Low
