

411 Brixton Avenue
St. Lambert, P.Q.
November 5, 1968

Dear Mr. Maclean,

Thank-you for your letter of November 2 and for the reports. Yes, Comet 1968e (Pereyra) was bright when discovered, but became faint very rapidly, and is now around magnitude 14. I did not see it myself, and since it is so faint, I am not sending out an announcement.

Best regards, and good observing,

Jim Low
