December 11, 1963.

Jas. W.A. Law,
411 Briston Ave.
St. Lambert P.Q.

Dear Sir.

Enclosed are the negative Comet's Nova
Search reports for November 1963. Our weather for this
month was very poor for observing - quite a change from
October!

Observations of Nova Herulis 1963 were also very few -
only two - as follows:

Nov. 3 - 9^m.5

Nov. 28 - 9^m.6

December seems to be very similar to November with
only one suitable night so far.

As you see from these reports my stock of
C.M. Form #2 has been used, and I would appreciate
some at your convenience.

Best wishes.

Hugh M.A. Maclean
Magara Falls Centre.
