Dear Sir:

During our last meeting of the R.A.S.C. which was held on the evening of March 31, the idea of distributing "lots" of the sky to members who were interested in watching their area for anything and giving regular reports. I am interested.

Would you please ~~send~~ tell me how to select an area, how big, or if you have the areas marked off already ~~the~~ would you please send to me ~~the~~ a copy of the sky already marked off into the lots.

If you just hand out lots, I'll take any, ~~but~~ of course.

I have binoculars and am making an 8" reflector which probably ~~will~~ will not be finished until Christmas.

I will be pleased to hear from you soon.

Yours truly,
 Brian Henry.
