Mr. A. L. Ostrander, National Coordinator  
Lunar Section, Standing Committee for Observational Activities  
Royal Astronomical Society of Canada

74 Brimorton Drive  
Toronto, Ontario

Dear Mr. Ostrander,

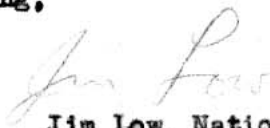

I was pleased to meet you at the General Assembly in Ottawa. Welcome to the role of National Coordinator! I hope that your section will do well (and I am sure it will) under your capable leadership.

For your information, I am enclosing the instruction and report forms used in the Comet and Nova Section, and some copies of past "Bulletins" and "Announcements" where I happen to have a few spare copies left. I have put your name on my mailing list for future "Bulletins".

Perhaps I could interest you in doing some work in the C & N Section. But, then, being a national coordinator myself, I know that you will have only a little time for observing yourself. I find that there is a lot of paper work involved, but I enjoy the work. (I must admit that I have done absolutely no lunar work myself for several years!).

Being a national coordinator, I am interested in what other Coordinators are doing, so please send me a copy of your "Bulletin" whenever you send one out. Personally, I would like to see an exchange of "Bulletins" between all National Coordinators. What do you think? I would like to know what other Coordinators are doing so that I could pick up ideas for this C & N Section.

Best regards, and good observing,

  
Jim Low, National Coordinator  
Comet and Nova Section  
S.C.O.A., R.A.S.C.
