252 COLLEGE STREET TORONTO 2B, ONTARIO

1964 July 28

Mr. Jim Low,
108 Roy Avenue,
Apartment 102,
Dorval, P.Q.

Dear Jim:

It was a great satisfaction to receive your announcement #9. The new comet Ikeya promises to attain a "reachable" magnitude, even if it is 0.7 magnitudes fainter than the predictions.

How about preparing a little note for the JOURNAL? The October issue is now going to the printer. Copy for the December issue needs to be in my hands by mid-September. You may have a summary of observations to report by then. Let me know what to expect.

Good observing to you!

Yours sincerely,

Ruth Northcott
