

ROYAL ASTRONOMICAL SOCIETY OF CANADA.  
Victoria Centre.

2159 Central Avenue,  
Victoria. B. C.  
October 24th - 1965.

Mr. J. Low,  
108 Roy Avenue,  
Dorval, Qué.

Dear Mr. Low,

It seems likely that you have received few, if any, reports of observations from this Centre, although some members do observe, but do not report.

Mr. Ball and I, with the support of the council, particularly the president, Mr. Lee, are planning for more activity, and we should appreciate receiving notices.

Request for observations of Comet Ikeyi-Seki was received, and although the weather was generally good, morning and evening skies were cloudy, especially near the horizon, no sighting was reported, and we have not heard of anyone seeing this object from this area.

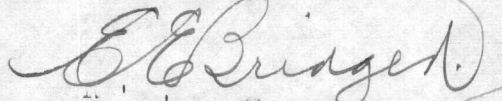

Notice of the comet in Hercules has been received.

As a commencement Comet, Nova Search and Aurora observations have been proposed, to be followed by Meteors, and I have already written to the A.A.V.S.O. concerning Nova Search areas, and I also addressed the opening meeting of the 1965 - 66 season on "The Importance of Amateur Work in Astronomy".

The address of Mr. George Ball is;-  
54 Maddock Avenue West,  
Victoria. B.C.

To enable us to get in touch with Earl Milton in reference to the Aurora, will you please let us have his address?. Any other information which you may give us will be appreciated.

Kind regards and best wishes,  
Sincerely,

  
Recording Secretary.
