

Quebec 30 Nov, 1965

Mr. Jim Low
Montreal,

My Dear Jim, Excuse me if I'm so
late to send you my report but
I was hoping that rotten Quebec city
weather will clear up... so I could
make some more observations...
but without success... the ceiling
is too many 1000 miles THICK...

I enclosed a PHOTO
taken by 2 of my Friends which
I hope you'll like... in case it will
be the only one you receive...
The comet has almost 30° of TAIL
on that PHOTO.

My brother YVES in San
Diego Calif... said that he don't care
about NOT seeing Halley's... because
he says that he has seen the COMET
of HIS LIFE... so he was glad to see
KEYA-S... I'll write to him to get
more details about his observations

I hope you'll let me
know if you were glad of my
reports & PHOTO... Sincerely, J. Matte
