

2604 Tourangeau Road,
Windsor, Ontario,
August 21, 1966.

Dear Sir,

In reply to the request in your letter of August 17, my equipment consists of 7x50 tripod-mounted binoculars, and a 2.4" equatorial refractor (magnifications 34x to 225x)

There are several things which I do not understand. In the "Negative Search Report Form", does the "magnitude" column require the naked eye limit, or the limit of the instrument? Also, what type of remarks are desired in the "remarks" column? Finally, if I use both binoculars in searching an area, should I fill out a report form for each instrument?

Yours truly,
Mark Gerasimoff
