Progress Report No. 2

November, 1966.

I. Summary of Observations by area.

| Observer         | Area                  | Total Observations |
|------------------|-----------------------|--------------------|
| David H. Levy    | Dome                  | 13                 |
| "                | Sun Vicinity          | 6                  |
| "                | Twilight Horizon      | 9                  |
| "                | Telescopic Comet Hunt | 6                  |
| Carl Jergensen   | 4                     | 2                  |
| David H. Levy    | 16                    | 9                  |
| "                | 23                    | 7                  |
| Vic Williams     | 34                    | 9                  |
| Carl Jergensen   | 36                    | 2                  |
| David H. Levy    | 40                    | 9                  |
| Carl Jergensen   | 41                    | 2                  |
| Vic Williams     | 44                    | 8                  |
| I. K. Williamson | 82                    | 2                  |
| David H. Levy    | 369                   | 6                  |
| "                | 377                   | 4                  |
| "                | 383                   | 6                  |
| "                | 384                   | 6                  |
| "                | 419                   | 10                 |
| "                | 428                   | 10                 |
| Vic Williams     | 429                   | 9                  |
| David H. Levy    | 438                   | 6                  |
|                  |                       | 141                |

II. Summary of Observations by observer.

| Observer          | Number of Areas       | Total Observations |
|-------------------|-----------------------|--------------------|
| Carl Jergensen    | 3                     | 6                  |
| David H. Levy     | 10 + 4 miscellaneous. | 107                |
| Vic Williams      | 3                     | 26                 |
| I. K. Williamson. | 1                     | 2                  |
|                   | 17 + 4 misc.          | 141                |

During November, 1966, four observers made 141 observations of 17 areas (and 4 miscellaneous areas.)

III. Comments.

During November it was decided that this section would conduct a Canada Centennial Project in 1967, the aim of which is to have, by the end of that year, one hundred areas under observation. This project was announced at two of the Saturday Observation Meetings (December 3 and 10). As far as December 10 four people expressed their intention to take on new areas.

Respectfully Submitted,  
*David H. Levy*  
 David H. Levy, Co-chairman.
