February 26, 1968

Dear Mr. Maclean,

Forgive me for not answering your letter of Nov. 14 sooner. It seems I got caught up with a number of problems, and I was awaiting extra copies of Announcement #13 from Toronto. Enclosed is a copy. I expect you have also received a copy of Announcement No. 14, and you should receive Announcement No. 15 in a week or so. In case there is a delay in the issuing of the next announcement, here is the ephemeris of Comet Ikeya-Seki, 1967n, for the next few weeks:

Feb. 29	17 16.0	42 02 N	
Mar. 5	17 17.5	49 14 N	Mag. 6.9
	10 17 17.7	56 51 N	
	15 17 15.7	64 36 N	6.9
	20 17 08.8	72 13 N	
	25 16 48.2	70 23 N	7.1
	30 15 20	85 32 N	

Please send reports of your observations in the near future. I plan to prepare a display for the General Assembly. Do you expect to be in Calgary for the meetings in May? I hope to see you then.

Best regards,

Jim Low
