Dear Sir:

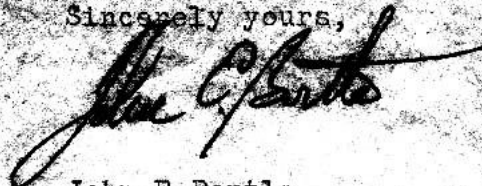

I would very much appreciate being put in touch with the person or persons in your society that receive cometary observations for reduction and analysis.

I am presently engaged in collecting observations of Comet 1967n, Ikeya-Seki II on a world wide scale so as to allow a more accurate analysis to be made.

All received observations will be computer reduced and plotted with careful examinations of coma size, tail type and length, etc. being made.

Your careful attention to this matter will be greatly appreciated.

Sincerely yours,

John E. Bortle
