Mr. Robert Paul  
61 Geneva Cres.  
St. Albert, Alberta

Dear Mr. Paul,

Thank-you for your letter requesting information on the Comet and Nova Section. Enclosed are forms describing this section, and they should be self-explanatory. If you have any questions, please let me know.

These forms are somewhat out of date, but are still useful as a guide. The entire Observational Activities programme is under review for possible re-organization, and have held off revising these forms as there may be changes in a number of the programmes in the near future.

Thank-you for the interest you have shown in this section.

Good Observing,

Jim Low
