COMET & NOVA SEARCH AREAS.

Numbers 1 to 175 are the A.A.V.S.O. Nova Search Areas.
 Numbers 176 to 438 are Comet Search Areas.

Each area is about 10° square, with the exceptions of areas 431 to 438. Novae are most likely to appear in areas 1 to 175, while comets may appear in any area. Observers should have at least two areas under observation at all seasons, having a total of four areas. At least one of these should be an A.A.V.S.O. number.
