

University of Toronto

FACULTY OF DENTISTRY

OFFICE OF THE DEAN

TORONTO 2

February 7, 1929

Dr. Geoffrey W. Bell,
Paris, Ont.

My dear Dr. Bell:

Journal 9 My attention has been drawn to the October issue of the Royal Astronomical Society of Canada and to your sonnet which appears in that issue.

I was very pleased to learn that you have taken an unusual interest in the subject of Astronomy. Most dentists settle down to routine practice and lose interest in scientific developments outside Dentistry. This is not as it should be and I hope that you will consent to send me a written account of your interest in Astronomy, how you have been able to maintain your interest while practising Dentistry, so that the members of the profession may be made aware of it.

Along with that I would like to publish the sonnet referred to or any other verse you have written.

I have a copy of your photograph taken at graduation but would greatly appreciate receiving one of your more recent photographs.

Sincerely yours,

Wallace Secomb
Dean
