

where produced, and what it
is tending to be, comets where
they have formed, what they
are, and what they are going
to be, all these great links
in the vast chain, have
found and all other links
in the chain that encircles.

Remains

Yours truly
James Price
52 Shaw St
Hamilton

Hamilton Nov 18 - 1897

Honourable Gentlemen as I do
not know any of you personally I am
obliged to address you as a collected
whole. I need not tell you that I am
an uneducated person, as you shall
immediately see that. Nevertheless though
this is an acknowledged disadvantage,
I have in spite of it made some
discoveries in natural things, which
I am not ashamed of, which is also
the object of my address to you at
this present. I need not say that
there is a great many things in the
expanding universe which are
undiscovered or rather unexplained
as yet. There is for instance suns
prominences sunspots Corona

comets and a great train of other things which if followed up would bring us to our own earth and to familiar things which are happening in our midst to the right and left. I hope gentlemen that it will not seem presumptuous to you for such as I to aspire to a discovery in these things. It has been said by Hershell that the worth of an idea is its capability to support itself, in keeping with known and observable facts. Now it is upon this bases that my idea stands, and as I know that it is capable of proving its own self true I do not hesitate in saying so. In the hands of those who are capable of knowing it will immediately confirm itself. I thought I would communicate with you first if you see it within

your pleasure to correspond with me it is supposed that modern science and the bible is at a disagreement but instead there is a glorious harmony. As it is said in the book of Job he spreadeth the north over the void place, and hangs the world upon nothing. The north means cold, it is as if he said then, he spreadeth the cold over the void place, that would mean space. He spreadeth cold throughout space and hangs the world upon nothing. My discovery makes arising out of all things which goes and returns back into itself. All the aforesaid phenomenon observed by others in vain as Galileo says is read and known by me. Such as sunfuel what it is, from where it comes, and its formation, the vast Corona what it is,
