Observer's Handbook Table Error!

Hello Members,

We are pleased to see how many of you rely on The Observer's Handbook by James Edgar for observing. To make sure we have your trust and meet your standards, we wish to inform you of an error within the handbook on page 132 which James pointed out regarding the table which can be used for the Annular Solar Eclipse on June 10. The *Observer's Handbook* page 132 has a table giving incorrect times. Check out the correct table below:
