

With kindest regards
H.R. Kingston

THE ROYAL ASTRONOMICAL SOCIETY OF CANADA

(LONDON CENTER)

PROGRAM 1930

| <u>Date</u> | <u>Subject</u> | <u>Speaker</u> |
|-------------|---|--|
| Jan. 10 | Theories of Cosmic Evolution | Prof. H.R.Kingston |
| Feb. 14 | Cosmic Rays or the Birth of an Atom | Prof. R.C.Dearle |
| Mar. 14 | The Interior of the Earth - Earthquakes | Prof. J.W.Russell |
| Apr. 11 | Eclipses (with special reference to the eclipses of this month) | Prof. H.R.Kingston |
| May 9 | Telling Time by the Stars | Dr. John Dearness |
| June 14 | Picnic and Observation | |
| Oct. 10 | Finding Your Way by the Stars | Prof. H.R.Kingston and Mr. T.C.Benson |
| Nov. 14 | Meteors, Meteorites, Bolides, Fire-balls (Appointment of Nominating Committee) | Rev. R.J.Bowen |
| Dec. 12 | Annual Meeting and Election of Officers | |

The London Center of The Royal Astronomical Society of Canada meets on the SECOND FRIDAY of each month except during the summer months. The annual picnic is held on Saturday.

Through the courtesy of Mr. E.E.Reid the meetings are held in his conference room in the LONDON LIFE BUILDING, corner of Dufferin Avenue and Wellington St. (Enter from Wellington Street.)

The meetings begin promptly at eight o'clock in order to afford time for observation whenever the weather permits. When observation is impossible the sky for the current month will be discussed. Members are advised to bring to each meeting a Star Guide, flash light, and the Handbook. Field glasses are useful for observation.

Anyone interested in astronomy may attend any meeting on the invitation of a member. Those wishing to join the society should communicate with the president, Prof. H.R.Kingston of The University of Western Ontario.
